PROFILE

Data Science undergraduate with strong foundations in AI/ML, NLP, and software development. Experienced in building and integrating machine learning models and automation workflows, with a focus on solving real-world problems efficiently. Proficient in Python, APIs, and modern development tools, with an interest in designing scalable and reliable AI-driven systems.

PROFESSIONAL EXPERIENCE

AI & ML Engineer Intern — Relai.world (ON-SITE)

Apr 2025 – Jun 2025

- Developed AI-powered automation workflows using n8n to streamline routine data processing tasks, reducing manual effort and saving approximately 20–30% processing time for repetitive operations.
- Built and integrated machine learning prototypes into automation pipelines, enabling faster data handling and reducing turnaround time for decision workflows.
- Worked with cloud-based AI services and APIs to test and integrate models, improving development efficiency and reducing integration time.

ServiceNow Intern — AICTE & SmartBridge (VIRTUAL)

Mar 2026 – Apr 2026

- Developed workflow automation solutions using the ServiceNow platform, reducing manual IT tasks and improving task completion speed by approximately 15–25%.
- Applied agentic AI concepts to design intelligent workflows, optimizing process flow and reducing dependency on manual interventions.
- Built dashboards and visualizations to monitor performance metrics, enabling quicker identification of bottlenecks and improving decision-making efficiency.

EDUCATION

- GITAM Deemed to Be University**, Hyderabad — **B.Tech in Data Science** (Aug 2023 – Jun 2027) | CGPA: 8.11 / 10.
- Sri Chaitanya Junior College** — Intermediate (MPC) (Jun 2021 – Mar 2023) | Percentage: 84%.
- Vignan School** — CBSE (Class 10) (Jun 2019 – Mar 2021) | Percentage: 79%.

SKILLS

- Languages:** Python, Java, C, JavaScript, SQL
- Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Node.js
- AI/ML & Data:** Machine Learning, Natural Language Processing (NLP), LLM Integration
- Tools & Technologies:** REST APIs, Git, WebSockets, n8n, ServiceNow

PROJECTS

Multi-Agent Insurance Decision System

- Built a multi-agent AI system to automate insurance quote processing, simulating real-world underwriting workflows used by insurance analysts and policy providers.
- Designed a modular pipeline combining machine learning models (Random Forest, Gradient Boosting) with rule-based logic for risk evaluation and decision routing.
- Automated evaluation workflows, reducing manual review effort by approximately 20–25% and improving consistency across multiple decision scenarios.

Tech: Python, Scikit-learn, Machine Learning

LinguaSync – Real-Time AI Translation Platform

- Developed a real-time multilingual translation platform using Gemini API, designed for students, travelers, and multilingual communication use cases.
- Implemented asynchronous backend services and WebSocket-based communication to enable low-latency, real-time interactions.
- Integrated fallback handling and optimized request flow to improve reliability and maintain stable performance during continuous usage.

Tech: JavaScript, Node.js, Gemini API, WebSockets

ACHIEVEMENTS

- Solved **100+** problems on LeetCode, strengthening problem-solving skills in data structures and algorithms.
- Achieved Gold Level in the **Accenture** Aspire Go for **Gold** program, demonstrating strong aptitude and analytical ability.
- Earned ServiceNow **Associate System Administrator** Badge, validating knowledge in workflow automation and platform fundamentals.
